

Injections

Scratches / Cuts

If you have any scratches, cuts or the like on your leg when you are admitted for surgery then your operation may be postponed if Mr Raj believes that these will pose a risk to you getting an infection at the time of your surgery.

Stay in Hospital

Mr Raj will come and see you when you arrive.

He will get you to sign a form (Consent Form) agreeing to the operation and explain the risks of the surgery.

Your surgery will be done as a day case, being admitted and discharged on the same day.

You will require:

- To be brought to hospital by car.
- To be taken home by car.
- Someone to be in the house on the night of the operation.
- A telephone at home.

Walking

You can walk with all your weight on the operated leg as soon as you return to the ward.

Follow-Up

Mr Raj will normally see you at 2 weeks after the operation to explain what he has done and what he expects in the future.
